

Finished Goods X-Ray Re-Inspection

Inspect, Reclaim, and Certify Your Product

- ☑ Mobile Service Delivered Directly to Your Facility (within 72 hours)
- ☑ Validated Inspector
- ☑ Inspection Conformity Certificate
- ☑ Traceability Reporting

METTLER TOLEDO finished goods re-inspection services support processors with on-hold inventory to manage foreign material incidents. We provide equipment to inspect suspect finished goods and provide detailed test reports to help processors make informed decisions to reclaim their product.

PXT™ Photon-Counting and Dual Energy technologies enable the detection of most standard foreign materials in packaged food and beverage at below 1mm, including a wide range of plastics, rubbers, stones, and glass to support you in clearing your on-hold finished production as quickly as possible.

We Are Able to Detect

- ☑ Bones
- ☑ Gaskets / o-rings
- ☑ Metals, stainless steel
- ☑ Plastics
- ☑ Dense foreign material
- ☑ Rubbers
- ☑ Stones
- ☑ Wires
